The directors do not have any interest to be entered in the Interest Register during the year.

REPORT OF THE DIRECTORS

Ghana Debt Exchange Program

On 5th December 2022, the Government of Ghana launched Ghana's Domestic Debt Exchange programme, an invitation for the voluntary exchange of approximately GHS137 billion of the domestic notes and bonds of the Republic, including E.S.L.A. and Daakye bonds, for a package of New Bonds to be issued by the Republic. The Exchange excludes Treasury Bills in totality, and notes and bonds held by individuals (natural persons). The potential Impacts of Debt Exchange on Financial Sector from stress tests conducted by the relevant financial sector regulators to estimate the potential impact of the Debt Exchange for banks, specialised deposit-taking institutions (SDIs), insurance firms, asset managers, collective investment schemes, pension fund trustees, and regulated pension schemes, that could result from their participation in the debt exchange indicates liquidity, decline in profitability and inadequacy of capital. To moderate the potential impact on the sector, the Bank of Ghana has announced some regulatory reliefs for banks to help preserve financial stability. The terms of the exchange were contained in a Memorandum of Exchange issued by the Ministry of Finance details of which are discussed in Note 20(iii). Subsequently, the program was concluded on February 21, 2023 with the settlement of the new bonds.

Commitment to Corporate Governance

The key guiding principles of the Bank's governance practices are:

- i. Good corporate governance for enhanced shareholder value
- ii. Clearly defined respective roles of Shareholders, Board of Directors and Management in the governance architecture
- iii. The Board of Directors to have majority of its membership as either Independent or Non-Executive Directors.

These principles have been articulated in a number of corporate documents, including the Bank's Constitution and the Board Charter.

There is a Board Charter which spells out the functions and powers of the Board and Board Sub-Committees. There are also various policies which define the role of the Board and the Managing Director with regard to certain specific matters including staff hiring and discipline.

REPORT OF THE DIRECTORS

The Board of Directors

The Board is responsible for setting the institution's strategic direction, leading and controlling the institution and monitoring activities of Executive Management.

As at 31 December 2022, the Board of Directors of Agricultural Development Bank Plc consisted of nine (9) members made up of an Independent Non-Executive Chairman, three (3) other Independent Non-Executive Directors, four (4) Non-executive Directors, and one (1) Executive Director.

The Board members have a wide range of experiences and in-depth knowledge in management, economics, finance, law and entrepreneurship, which enable them to make informed decisions and valuable contributions to the Bank's progress.

The Board has delegated various aspects of its work to the Credit and Risk, Audit, IT, Research & Strategy, Human Resource and Governance and Cyber and Information Security Board Sub-Committees.

Board Credit and Risk Committee

The role of the committee includes:

- i. Assisting Management in the recognition of risks and also to ensure that the Board is made aware of inherent and emerging risks and to review all risks to which the Bank is exposed, assess from time to time their relative importance and evaluate whether the resources and controls designed to manage each risk are proportionate to the quantum of risk involved.
- ii. It reviews and approves the credit risk strategy and credit risk policies of the Bank. It assists Management in evaluating the overall credit risks faced by the Bank and sets an acceptable risk appetite and tolerance the Bank is willing to engage and the level of profitability the Bank expects to achieve for booking the various credits. The management of credit risk largely encompasses activities relating to loans and advances, albeit that credit risks exists throughout the other activities of the Bank both on and off balance sheet. These activities include acceptances, inter-bank transactions, trade financing, foreign exchange transactions, futures, swaps, options and guarantees etc.;
- iii. It reviews operational and market risks faced by the Bank and the management of such risks;
- iv. It ensures the establishment in the Bank of a compliance culture including Anti-Money Laundering and Combating the Financing of Terrorism ("AML/CFT") risk management culture and promote the adoption of an appropriate ethical and compliance standards in the conduct of the business of the Bank.
- v. The review of risks with a frequency that it judges to be proportionate to their materiality to the Bank paying particular attention to new risks arising from changes in the Bank's business strategy and those arising from the wider current commercial, economic and political environment. The Committee reviews the comprehensiveness of record of risks from time to time and updates it where appropriate.
- vi. The consideration prior to implementation of all new products, significant changes in the balance of the business of the Bank or scale of its operations in any area. The consideration of all proposed changes to key systems and operational controls, management structure and key responsibilities of the senior management team.

REPORT OF THE DIRECTORS

- vii. Assisting management in the recognition of risks and also to ensure that the Board is made aware of changes in the risk profile arising from:
- Asset quality concentration
 - Counterparty limits
 - Currency, maturity and interest rate mismatches
 - The external environment, including country risk for any country where the Bank has a significant exposure
 - Business strategy and competition
 - Operational risk, including vulnerability to fraud, human resources and business continuity
 - Legal, compliance and reputational risk
- viii. The committee annually reviews its terms of reference and modus operandi and makes recommendations for changes that it considers appropriate to the Board.

The composition of the Committee is as follows:

Board balance and independence

The composition of the Board of Directors and its Sub-Committees is regularly reviewed to ensure that the balance, maintenance and mix of skills, independence, knowledge and experience.

Code of Conduct, Ethics Charter and Conflict of Interest Policies

The Board has approved Ethics Charter and Conflict of Interest policy that regulate the conduct of Directors. In addition, an approved Code of Conduct regulate the Conduct of all employees. Management has communicated the principles in the Bank's Code of Conduct to employees to provide guidance in the discharge of their duties. The above-mentioned policies set the standards of professionalism and integrity required for the Bank's operations, which cover compliance with applicable laws, conflict of interest, environmental issues, reliability of financial reporting, bribery and strict adherence to laid down procedures, to eliminate the potential for illegal and unethical practices.

REPORT OF THE DIRECTORS

Anti-Money Laundering and Anti-Terrorism

The Bank additionally has an established Compliance and Anti-Money Laundering and Anti-Terrorism departments and monitoring systems in place in compliance with the requirements of Ghana's Anti-Money Laundering Act 2020 (Act 1044) and Anti-Terrorism Act 2008, Act 762. These include due diligence for opening new accounts, customer identification, monitoring of high-risk accounts, record keeping, training and sensitisation of staff on money laundering. These systems and measures assist in reducing regulatory and reputational risks to the Bank's business.

Internal Control Systems

The Directors have overall responsibility for the Bank's internal control systems and annually reviews their effectiveness, including a review of financial, operational, compliance and risk management controls. The implementation and maintenance of the Risk Management and Internal Control Systems are the responsibility of the Executive Directors and Senior Management. The systems are designed to manage rather than eliminate the risk of failure in order to achieve the Bank's business objectives and to provide reasonable, but not absolute assurance against material misstatement or loss. The Directors have reviewed the effectiveness of the internal control systems, including controls related to financial, operational and reputational risks identified by the company as at the reporting date and no significant failings or weaknesses were identified during the review.

Directors' Performance Evaluation

In May 2022 and in compliance with Section 46 of Bank of Ghana's Corporate Governance Directive (2018), the Board of Directors carried out self-evaluation for the period spanning January 1, 2021 to December 31, 2021.

The performances of the Board of Directors as a collage, the Sub-Committees, the Board Chairman, individual Directors and the Company Secretary were evaluated.

The evaluation process was designed to assess among others, the performance in the following areas:

- Effectiveness of Board Management oversight
- Strategic Plan setting and monitoring
- Availability and mix of right knowledge and skills
- Inside and outside Board relationship
- Conduct of meetings and communication
- Effectiveness of Controls, Risk Management and regulatory compliance.

The following is the summary of key findings from the Board evaluation that required remedial actions;

- i. Improvement in the tracking and effective implementation of Board directives and recommendations
- ii. Improvement required in the management and monitoring of the of the loan portfolio
- iii. Enhanced efficiency and improvement in processes, including the turn-around-time for the credit process.

Subsequent to the evaluation, the Board and Management outlined measures to resolve the matters listed above.

A full copy of the Board Self-Evaluation Report was submitted to the Bank of Ghana on July 4, 2022.

AGRICULTURAL DEVELOPMENT BANK PLC

REPORT OF THE DIRECTORS

Professional development and training

The National Banking College offered annual corporate governance certification training to all the Directors of the Bank. The topics covered under the corporate governance certification training were:

- ▶ Internal Board Evaluations - Actions Before, During and After
- ▶ Ethical Leadership and Conduct Challenges in the Boardroom
- ▶ Risk Governance and Implication of the Risk Management Directive

Conflicts of interest

The Bank has established appropriate conflicts authorisation procedures by which actual or potential conflicts are regularly reviewed and authorisations sought as appropriate. The Bank also maintains an Interest Register pursuant to Section 196 of the Companies Act 2019 (Act 992). During the year under review, one entry was made in the Interest Register.

Approval of the financial statements

The financial statements of Agricultural Development Bank Plc, as identified in the first paragraph, were approved by the Board of Directors and signed on their behalf by:

.....
CHAIRMAN

Date: April 30, 2023

.....
DIRECTOR

Date: April 30, 2023

**INDEPENDENT AUDITOR'S REPORT
TO THE SHAREHOLDERS OF
AGRICULTURAL DEVELOPMENT BANK PLC**

Report on the audit of the financial statements

Opinion

We have audited the financial statements of the Agricultural Development Bank Plc (the Bank) set out on pages 25 to 132 which comprise the Statement of Financial Position as at December 31, 2022, the Statement of Profit or Loss, the Statement of Comprehensive Income, the Statement of Changes in Equity and the Statement of Cash Flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Bank as at December 31, 2022, and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS) and also in the manner required by the provisions of the Companies Act, 2019 (Act 992) as well as the Banks and Specialised Deposit-Taking Institutions Act, 2016 (Act 930).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the company in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of financial statements in Ghana, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The result of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

Key Audit Matter	How the matter was addressed in the audit
Allowance for expected credit losses on loans and advances to customers	
<p>IFRS 9 introduced a forward-looking Expected Credit Loss (ECL) model. The ECL model is to reflect the general pattern of deterioration or improvement in the credit quality of financial instruments. The amount of ECL's recognized as a loss allowance or provision depends on the extent of credit deterioration since the initial recognition. The recognition of impairment could be done on a 12-month expected credit losses or Lifetime expected credit losses.</p> <p>Impairment computations under IFRS 9 therefore involves the use of models that take into account:</p> <ul style="list-style-type: none"> ► The probability-weighted outcome. ► Reasonable and supportable information that is available without undue cost. <p>Significant judgements in the determination of the Bank's Expected Credit Loss include:</p> <ul style="list-style-type: none"> ► Use of assumptions in determining various ECL modelling parameters including probability of default and loss given default. ► Determination of a significant increase credit risk and ► Determination of associations between macroeconomic scenarios. <p>The use of different models and assumptions can significantly affect the level of allowance for expected credit losses on loans and advances to customers. Due to the significance of such loans which account for about 44% of total assets of the bank, and the significant use of judgements, assessment of allowance for expected credit losses has been identified as a key audit matter.</p> <p>As disclosed in note 21 of the financial statements, an impairment loss of GHS512m is held against the loan exposure.</p> <p>Further disclosures relating to these amounts and the Bank's accounting policies regarding estimating these ECLs have been disclosed in Note 5.4 and Note 21 respectively of these financial statements.</p>	<p>We have obtained an understanding of the Bank's IFRS 9 provisioning process as well as the credit risk modelling methodology.</p> <p>We validated and tested the ECL model of the Bank by assessing the data inputs and assumptions driving the model calculations.</p> <p>We have also performed the following substantive audit procedures:</p> <ul style="list-style-type: none"> ► Reviewed and tested the methodology developed to calculate loan loss provision under IFRS 9, concentrating on aspects such as factors for determining a 'significant increase in credit risk', staging of loans, testing specific models related to Probability of Default (PD), Loss Given Default (LGD), Exposure at Default (EAD). ► Recalculated ECL estimates, ► Reviewed forward looking information / multiple economic scenario elements. ► For stage 3 exposures, we tested the reasonableness of the assumptions underlying the impairment identification and quantification including forecasts of future cash flows, valuation of underlying collateral, estimated period of realisation for collaterals, etc. ► We have also reviewed information relating to the allowance for expected credit losses on loans and advances to customers disclosed in the notes to the financial statements of the Bank.

Key Audit Matter	How the matter was addressed in the audit
Expected Credit Loss (ECL) assessments on sovereign exposures (Government Bills and Bonds)	
<p>As disclosed in note 20 of the financial statements, the bank held material exposure to treasury bills (GHS 380,314) and bonds (GHS 1,277,414).</p> <p>In the year under review, government initiated a Debt Exchange Programme as part of a comprehensive agenda to restore debt and fiscal sustainability. This debt restructuring programme is critical component of both the debt reduction and the IMF programme that government has sought to help restore economic stability.</p> <p>The Bank applied IFRS9 model in determining the ECL impacts of the debt restructure programme on its exposure to these instruments. Management exercised significant judgements regarding inputs, assumptions, and techniques for estimating ECL and staging of these instruments. Key judgements and estimates include</p> <ul style="list-style-type: none"> • fair value determination of the new bonds government announced as replacement for the bonds held at 31 December 2022, • Various scenarios and probability weights assigned to these scenarios as well as estimate of expected cash shortfalls under each of these scenarios • Assessment of Significant Increase in Credit Risk (SICR); and • Determination of whether the existing instruments would have suffered significant modification based on the terms of the restructure <p>Further details of the debt restructuring programme and the company's IFRS 9 assessment and related ECL impacts are disclosed in note 20 of these financial statements.</p>	<p>We obtained and reviewed the communications from government regarding the debt restructuring programme.</p> <p>We assessed IFRS 9 and other accounting implications of this debt restructuring programme.</p> <p>Together with our specialist teams, we reviewed critical inputs used in assessing ECL on these instruments including staging, fair value calculations, scenarios and related probability weights among others.</p> <p>We reviewed industry guidance issued by the Institute of Chartered Accountants Ghana (ICAG) regarding accounting implications of the debt restructure.</p> <p>We evaluated the reasonableness of management assumptions and judgments and tested the reasonableness of management's ECL calculations.</p> <p>We also reviewed the reasonableness of the impairment in line with our understanding of the macro-economic environment and the banking industry.</p> <p>We assessed the adequacy of the management's disclosure regarding impairment of bond balances in line with IFRS 9 requirements.</p>

Other Information

The Directors are responsible for the other information. The other information comprises the information included in the 135-page document titled "Agricultural Development Bank Plc, Annual Report and Financial Statements, 31 December 2022", which includes the Report of Directors, and Other Disclosures as required by the Companies Act, 2019 (Act 992) and Specialised Deposit-Taking Institutions Act, 2016 (Act 930). The other information does not include the financial statements and our Auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the financial statements

The Directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards (IFRS) and the requirements of the Companies Act, 2019 (Act 992) as well as the Banks and Specialised Deposit-Taking Institutions Act, 2016 (Act 930), and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Bank or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting processes.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an Auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our Auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our Auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the bank to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the Bank's audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal controls that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our Auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal requirements

The Companies Act, 2019 (Act 992) requires that in carrying out our audit we consider and report on the following matters. We confirm that:

- We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
- In our opinion, proper books of account have been kept by the Bank, so far as appears from our examination of those books;
- Proper returns adequate for the purpose of our audit have been received from branches not visited by us; and
- The statement of financial position, the statement of profit and loss and the statement of comprehensive income are in agreement with the books of account and returns.
- In our opinion, to the best of our information and according to the explanations given to us, the accounts give the information required under the Act, in the manner so required and give a true and fair view of the state of affairs of the company at the end of the financial year and of the profit or loss for the financial year then ended.
- We are independent of the Bank pursuant to Section 143 of the Companies Act, 2019 (Act 992).

The Banks and Specialised Deposit-Taking Institutions Act, 2016 (Act 930) under Section 85(2) requires that we state certain matters in our audit report. Accordingly, we state that;

- The accounts give a true and fair view of the statement of affairs of the Bank and the results of operations for the year under review.
- We were able to obtain all the information and explanations required for the efficient performance of our duties.
- The transactions of the Bank are generally within the powers of the Bank;
- The Bank has generally complied with the provisions of the Banks and Specialised Deposit-Taking Institutions Act, 2016 (Act 930) except as disclosed in notes 22 and 46(ii) of these financial statements
- The Bank has generally complied with the provisions of the Anti-Money Laundering Act, 2008 (Act 749), the Anti-Terrorism Act, 2008 (Act 762) and regulations made under these enactments.

The Engagement Partner on the audit resulting in this independent Auditors' report is Emmanuel Adekahlor (ICAG/P/1596).

2. BASIS OF ACCOUNTING AND CHANGES IN ACCOUNTING POLICIES

a) Basis of preparation

The financial statements have been prepared on a historical cost basis and equity instruments at fair value through other comprehensive income (FVOCI) all of which have been measured at fair value.

These financial statements are presented in Ghana Cedi, which is the Bank's functional currency. All amounts have been rounded to the nearest thousands including amounts disclosed in the narratives, except when otherwise indicated.

b) *Statement of compliance*

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standard Board (IASB) and in the manner required by the Companies Act 2019, (Act 992), and the Banks and Specialised Deposit-Taking Institutions Act, 2016 (Act 930).

2.1. Changes in accounting policies and disclosures

Interest Rate Benchmark Reform ("IBOR reform")

Interest Rate Benchmark Reform Phase 2 provides temporary reliefs to address the accounting issues which arise upon the replacement of an InterBank Offered Rate (an IBOR) with an alternative nearly risk-free interest rate (an RFR). For the purposes of these financial statements, the bank does not have any exposures to IBORs that are subject to reform and therefore the amendments had no impact.

2.2. New and amended standards and interpretations issued but not yet effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Bank's financial statements are disclosed below. The Bank intends to adopt these standards, if applicable, when they become effective.

Amendments to IAS 1: *Classification of Liabilities as Current or Non-current*

In January 2020, the IASB issued amendments to paragraphs 69 to 76 of IAS 1 to specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

2. BASIS OF ACCOUNTING AND CHANGES IN ACCOUNTING POLICIES (CONTINUED)

2.2. New and amended standards and interpretations (Continued)

The amendments are effective for annual reporting periods beginning on or after 1 January 2023 and must be applied retrospectively. The Bank is currently assessing the impact the amendments will have on current practice and whether existing loan agreements may require renegotiation.

Reference to the Conceptual Framework - Amendments to IFRS 3

In May 2020, the IASB issued Amendments to IFRS 3 Business Combinations - Reference to the Conceptual Framework. The amendments are intended to replace a reference to the Framework for the Preparation and Presentation of Financial Statements, issued in 1989, with a reference to the Conceptual Framework for Financial Reporting issued in March 2018 without significantly changing its requirements.

The Board also added an exception to the recognition principle of IFRS 3 to avoid the issue of potential 'day 2' gains or losses arising for liabilities and contingent liabilities that would be within the scope of IAS 37 or IFRIC 21 Levies, if incurred separately.

At the same time, the Board decided to clarify existing guidance in IFRS 3 for contingent assets that would not be affected by replacing the reference to the Framework for the Preparation and Presentation of Financial Statements.

The amendments are effective for annual reporting periods beginning on or after 1 January 2022 and apply prospectively.

Property, Plant and Equipment: Proceeds before Intended Use - Amendments to IAS 16

In May 2020, the IASB issued Property, Plant and Equipment – Proceeds before Intended Use, which prohibits entities deducting from the cost of an item of property, plant and equipment, any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling such items, and the costs of producing those items, in profit or loss.

The amendment is effective for annual reporting periods beginning on or after 1 January 2022 and must be applied retrospectively to items of property, plant and equipment made available for use on or after the beginning of the earliest period presented when the entity first applies the amendment.

The amendments are not expected to have a material impact on the Bank.

Onerous Contracts - Costs of Fulfilling a Contract - Amendments to IAS 37

In May 2020, the IASB issued amendments to IAS 37 to specify which costs an entity needs to include when assessing whether a contract is onerous or loss-making.

The amendments apply a "directly related cost approach". The costs that relate directly to a contract to provide goods or services include both incremental costs and an allocation of costs directly related to contract activities. General and administrative costs do not relate directly to a contract and are excluded unless they are explicitly chargeable to the counterparty under the contract.

The amendments are effective for annual reporting periods beginning on or after 1 January 2022. The Bank will apply these amendments to contracts for which it has not yet fulfilled all its obligations at the beginning of the annual reporting period in which it first applies the amendments.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

2. BASIS OF ACCOUNTING AND CHANGES IN ACCOUNTING POLICIES (CONTINUED)

2.2. New and amended standards and interpretations (Continued)

IFRS 1 *First-time Adoption of International Financial Reporting Standards* - Subsidiary as a first-time adopter

As part of its 2018-2020 annual improvements to IFRS standards process, the IASB issued an amendment to IFRS 1 *First-time Adoption of International Financial Reporting Standards*. The amendment permits a subsidiary that elects to apply paragraph D16(a) of IFRS 1 to measure cumulative translation differences using the amounts reported by the parent, based on the parent's date of transition to IFRS. This amendment is also applied to an associate or joint venture that elects to apply paragraph D16(a) of IFRS 1.

The amendment is effective for annual reporting periods beginning on or after 1 January 2022 with earlier adoption permitted.

IFRS 9 *Financial Instruments* - Fees in the '10 per cent' test for derecognition of financial liabilities

As part of its 2018-2020 annual improvements to IFRS standards process the IASB issued amendment to IFRS 9. The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf. An entity applies the amendment to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment.

The amendment is effective for annual reporting periods beginning on or after 1 January 2022 with earlier adoption permitted. The Bank will apply the amendments to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment.

The amendments are not expected to have a material impact on the Bank.

IAS 41 *Agriculture* - Taxation in fair value measurements

As part of its 2018-2020 annual improvements to IFRS standards process the IASB issued amendment to IAS 41 *Agriculture*. The amendment removes the requirement in paragraph 22 of IAS 41 that entities exclude cash flows for taxation when measuring the fair value of assets within the scope of IAS 41.

An entity applies the amendment prospectively to fair value measurements on or after the beginning of the first annual reporting period beginning on or after 1 January 2022 with earlier adoption permitted.

The amendments are not expected to have a material impact on the Bank.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

2. BASIS OF ACCOUNTING AND CHANGES IN ACCOUNTING POLICIES (CONTINUED)

2.2. New and amended standards and interpretations (Continued)

IFRS 17 - Insurance contracts

In May 2017, the IASB issued IFRS 17 *Insurance Contracts* (IFRS 17), a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, IFRS 17 will replace IFRS 4 *Insurance Contracts* (IFRS 4) that was issued in 2005. IFRS 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply. IFRS 17 introduces new accounting requirement for banking products with insurance features that may affect the determination of which instruments or which components thereof will be in the scope of IFRS 9 or IFRS 17.

Loan contracts that meet the definition of insurance but limit the compensation for insured events to the amount otherwise required to settle the policyholder's obligation created by the contract: Issuers of such loans - e.g. a loan with waiver on death - have an option to apply IFRS 9 or IFRS 17. The election would be made at a portfolio level and would be irrevocable.

IFRS 17 is effective for reporting periods beginning on or after 1 January 2023, with comparative figures required. Early application is permitted, provided the entity also applies IFRS 9 and IFRS 15 on or before the date it first applies IFRS 17.

The Bank is currently in the process of assessing the impact of adopting IFRS 17 on its financial statements.

Definition of Accounting Estimates - Amendments to IAS 8

In February 2021, the IASB issued amendments to IAS 8, in which it introduces a definition of 'accounting estimates'. The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. Also, they clarify how entities use measurement techniques and inputs to develop accounting estimates.

The amendments are effective for annual reporting periods beginning on or after 1 January 2023 and apply to changes in accounting policies and changes in accounting estimates that occur on or after the start of that period. Earlier application is permitted as long as this fact is disclosed.

The amendments are not expected to have a material impact on the Bank.

Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2

In February 2021, the IASB issued amendments to IAS 1 and IFRS Practice Statement 2 Making Materiality Judgements, in which it provides guidance and examples to help entities apply materiality judgements to accounting policy disclosures. The amendments aim to help entities provide accounting policy disclosures that are more useful by replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies and adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures.

The amendments to IAS 1 are applicable for annual periods beginning on or after 1 January 2023 with earlier application permitted. Since the amendments to the Practice Statement 2 provide non-mandatory guidance on the application of the definition of material to accounting policy information, an effective date for these amendments is not necessary.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Bank is currently assessing the impact of the amendments to determine the impact they will have on the Bank's accounting policy disclosures.

The following are the principal accounting policies adopted by the company in the preparation of these financial statements.

These accounting policies have been applied consistently in dealing with items that are considered to be material to the Company's

The Bank has consistently applied the following accounting policies to all periods presented in these financial statements.

Set out below is an index of the significant accounting policies, the details of which are available on the pages that follow.

- (a) Foreign currency transaction
- (b) Interest income and expense
- (c) Fee and commission
- (d) Net trading income
- (e) Dividend income
- (f) Leases
- (g) Income tax
- (h) Financial assets and financial liabilities
- (i) Fair value measurement
- (j) Cash and cash equivalents
- (k) Investment securities
- (l) Property and equipment
- (m) Intangible assets
- (n) Impairment of non-financial assets
- (o) Deposits and due to other banks
- (p) Provisions
- (q) Financial guarantees and loan commitments
- (r) Fiduciary activities
- (s) Employee benefits
- (t) Stated capital and reserves
- (u) Earnings per share
- (v) Investment in associates
- (w) Operating segments

a. Foreign currency transaction

Transactions in foreign currencies are translated into the functional currency using exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are re-translated at closing inter-bank mid rates ruling at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated at exchange rates ruling at the dates of initial recognition. Non-monetary items denominated in a foreign currency that are measured at fair value are translated at exchange rates ruling at the date when fair value was determined.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONTINUED)

a. Foreign currency transaction (continued)

Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from re-translation at year-end exchange rates of foreign currency denominated monetary assets and liabilities are recognized in profit or loss, except for differences on translation of equity investments in respect of which an election has been made to present subsequent changes in fair value and differences arising on translation of equity investments in other comprehensive income.

All foreign exchange gains and losses recognized in profit or loss are presented net within the corresponding item. Foreign exchange gains and losses on other comprehensive income items are presented in other comprehensive income within the corresponding item.

These financial statements are presented in Ghana Cedi, which is the Bank's functional currency. All amounts have been rounded to the nearest thousands, except when otherwise indicated.

b. Interest income and expense

Interest income and expense for all interest-bearing financial instruments are recognised within 'interest income' and 'interest expense' in profit or loss using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and allocating interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Bank estimates cash flows considering all contractual terms of the financial instrument, including prepayment options, but does not consider future credit losses.

The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

c. Fees and commissions

Fee and commission income and expense that are integral to the effective interest rate on a financial asset or financial liability are included in the effective interest rate. Other fee and commission income - including account servicing fees, investment management fees, sales commission, placement fees and syndication fees - is recognised as the related services are performed. If a loan commitment is not expected to result in the draw-down of a loan, then the related loan commitment fee is recognised on a straight-line basis over the commitment period. A contract with a customer that results in a recognised financial instrument in the Bank's financial statements may be partially in the scope of IFRS 9 and partially in the scope of IFRS 15. If this is the case, then the Bank first applies IFRS 9 to separate and measure the part of the contract that is in the scope of IFRS 9 and then applies IFRS 15 to the residual. Other fee and commission expenses relate mainly to transaction and service fees, which are expensed as the services are received.

d. Net trading income

Net trading income comprises gains less losses relating to trading assets and liabilities, including realised and unrealised fair value changes, interest and foreign exchange differences.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONTINUED)

e. Dividend income

Dividend income is recognized in profit or loss when the Bank's right to payment income is established.

f. Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

The Company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. Low value assets and short-term leases are classified as operating leases and are not recognized in the Bank's statement of financial position. These leases are recognised on a straight-line basis.

Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (less any lease incentives receivable), variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease if the lease term reflects exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses in the period in which the event or condition that triggers the payment occurs.

g. Income Tax

Income tax expense comprises current and deferred tax. Income tax expense is recognized in profit or loss except to the extent that it relates to items recognized in equity or OCI.

Current tax is the expected tax on tax payable on taxable income for the period, using tax rates enacted or substantively enacted at the reporting date.

Deferred tax is recognized in respect of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for the following temporary differences: the initial recognition of goodwill, the initial recognition of assets and liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONTINUED)

g. Income Tax (Continued)

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when reversed, based on laws that have been enacted or substantively enacted by the reporting date. A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or the tax assets and liabilities will be realised simultaneously.

h. Financial assets and financial liabilities

(i) Recognition

The Bank initially recognises loans and advances, deposits, debt securities issued on the date on which they are originated. All other financial instruments (including regular-way purchases and sales of financial assets) are recognised on the trade date, which is the date on which the Bank becomes a party to the contractual provisions of the instrument. A financial asset or financial liability is measured initially at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue.

(ii) Classification

Financial assets

The classification of financial instruments at initial recognition depends on their contractual terms and the business model for managing the instruments. Financial instruments are initially measured at their fair value, except in the case of financial assets and financial liabilities recorded at FVPL, transaction costs are added to, or subtracted from, this amount. Trade receivables are measured at the transaction price.

When the fair value of financial instruments at initial recognition differs from the transaction price, the Bank accounts for the Day 1 profit or loss.

The Bank classifies all of its financial assets based on the business model for managing the assets and the asset's contractual terms, measured at either:

- Amortised cost
- FVOCI
- FVTPL

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONTINUED)

h. Financial assets and financial liabilities (Continued)

(ii) Classification (Continued)

Due from banks, Loans and advances to customers, Financial investments at amortised cost

The Bank measures Due from banks, Loans and advances to customers and other financial investments at amortised cost only if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding

The details of these conditions are outlined below.

Business model assessment

The Bank determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective:

- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed.
- How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).

The expected frequency, value and timing of sales are also important aspects of the Bank's assessment. The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Bank's original expectations, the Bank does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

The Solely Payments of Principal and interest test (SPPI)

As a second step of its classification process the Bank assesses the contractual terms of the financial asset to identify whether they meet the SPPI test.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortization of the premium/discount).

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONTINUED)

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Bank applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than the minimum exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVPL.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

On initial recognition of an equity investment that is not held for trading, the Bank may irrevocably elect to present subsequent changes in fair value in OCI. This election is made on an investment-by-investment basis. All other financial assets are classified as measured at FVTPL. In addition, on initial recognition, the Bank may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONTINUED)

i. Fair value measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Bank has access at that date. The fair value of a liability reflects its non-performance risk. When one is available, the Bank measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. If there is no quoted price in an active market, then the Bank uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction. The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price - i.e. the fair value of the consideration given or received. If the Bank determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognised in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out. If an asset or a liability measured at fair value has a bid price and an ask price, then the Bank measures assets and long positions at a bid price and liabilities and short positions at an ask price.

j. Cash and cash equivalents

Cash and cash equivalents include notes and coins on hand, unrestricted balances held with central banks and highly liquid financial assets with original maturities of three months or less from the date of acquisition that are subject to an insignificant risk of changes in their fair value, and are used by the Bank in the management of its short-term commitments. Cash and cash equivalents are carried at amortised cost in the statement of financial position.

For the purposes of the statement of cash flows, cash equivalents include short term liquid investments which are readily convertible into known amounts of cash and which were within three months of maturity when acquired.

k. Investment securities

The 'investment securities' caption in the statement of financial position includes:
- equity investment securities designated as at FVOCI.

When equity instruments are measured at FVOCI, gains and losses on such equity instruments are never reclassified to profit or loss and no impairment is recognised in profit or loss. Dividends are recognised in profit or loss unless they clearly represent a recovery of part of the cost of the investment, in which case they are recognised in OCI. Cumulative gains and losses recognised in OCI are transferred to retained earnings on disposal of an investment.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONTINUED)

I. Property, plant and equipment

(i) Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses or as professionally revalued from time to time less accumulated depreciation. Cost includes expenditure that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located, and capitalised borrowing costs.

Land and building are measured at fair value. Changes in fair value are recorded in OCI and credited to the asset revaluation surplus in equity. However, to the extent that it reverses a revaluation deficit of the same asset previously recognised in profit or loss, the increase is recognised in profit and loss. A revaluation deficit is recognised in the statement of profit or loss, except to the extent that it offsets an existing surplus on the same asset recognised in the asset revaluation surplus. Revaluation are performed on a regular basis. Accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Upon disposal, any revaluation surplus relating to the particular asset being sold is transferred to retained earnings

Purchased intangible assets that is integral to the functionality of the related equipment is capitalised as part of that equipment.

Increases in the carrying amount arising on revaluation are credited to a revaluation surplus. Decreases that offset previous increases of the same asset are charged against the revaluation surplus. All other decreases are charged to profit or loss.

When parts of an item of property or equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

Capital Work in Progress is carried at cost less accumulated impairment.

The gain or loss on disposal of an item of property, plant and equipment is determined by comparing the proceeds from disposal with the carrying amount of the item of property, plant and equipment and is recognised in other income/other expenses in profit or loss.

(ii) Subsequent costs

The cost of replacing part of an item of property or equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Bank and its cost can be measured reliably. The costs of the day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONTINUED)

(iii) Depreciation

Depreciation is calculated over the depreciable amount, which is the cost of the asset, or other amount substituted for cost, less its residual value. Depreciation is recognised in profit or loss on a straight-line basis over its expected useful lives of each part of an item or property and equipment, since this most closely reflects the expected pattern consumption of the future economic benefits embodied in the asset. Land is not depreciated

The estimated useful lives for the current and comparative periods are as follows:

Buildings	20 years
Motor vehicles	4 years
Furniture and equipment	5 years
Computers	5 years
Leasehold Improvement	lower of the estimated useful life and the lease tenor

Depreciation methods, useful lives and residual values are reassessed at each reporting date and adjusted if appropriate.

m. Intangible assets

Computer intangible

Intangible assets comprise computer intangible. Intangible acquired by the Bank is measured at cost less accumulated amortization and any accumulated impairment losses.

Subsequent expenditure on intangible is capitalized only when it increases future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

Intangible assets are amortized on a straight-line basis and recognized in profit or loss over its estimated useful life, from the date that it is available for use. The estimated useful life of intangible for the current and comparative periods is five years.

Amortization methods, useful lives and residual values are reviewed at each reporting date and adjusted, if appropriate.

n. Impairment of non-financial assets

The carrying amounts of the Bank's non-financial assets other than corporate tax assets and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. A cash-generating unit is the smallest identifiable asset that generates cash flows that are largely independent from other assets. Impairment losses are recognised in Profit or Loss.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONTINUED)

n. Impairment of non-financial assets (Continued)

Impairment losses recognised in respect of cash generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit (group of units) on a pro rata basis.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

In respect of other assets, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognized

o. Deposits and borrowed funds

Deposits and borrowings from other banks are the Bank's sources of debt funding. The Bank classifies capital instruments as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instrument.

Deposits and borrowings from other banks are initially measured at fair value plus transaction costs, and subsequently measured at their amortised cost using the effective interest method, except where the Bank chooses to carry the liabilities at fair value through profit or loss.

p. Provisions

Provisions are recognised when the Bank has a present legal or constructive obligation as a result of past events that can be reliably estimated and it is probable that an outflow of resources will be required to settle the obligation. Restructuring provisions comprise lease termination penalties and employee termination payments. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations which are likely to result in an outflow to settle related classes of obligations as a whole, a provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of expenditures expected to be required to settle obligations using pre-tax rates that reflect current market assessments of the time value of money and risks specific to the obligation. An increase in the provision due to passage of time is recognised as an interest expense.

NOTES TO THE FINANCIAL STATEMENTS

31 DECEMBER 2022

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONTINUED)

q. Financial guarantee and loan commitments

Financial guarantees are initially recognised in the financial statements (within Other Liabilities) at fair value, being the premium received. Subsequent to initial recognition, the Bank's liability under each guarantee is measured at the higher of the amount initially recognised less cumulative amortisation recognised in the income statement, and an ECL allowance as set out in Note 40.

The premium received is recognised in the income statement in Net fees and commission income on a straight-line basis over the life of the guarantee.

Undrawn loan commitments and letters of credits are commitments under which, over the duration of the commitment, the Bank is required to provide a loan with pre-specified terms to the customer. Similar to financial guarantee contracts, these contracts are in the scope of the ECL requirements.

The nominal contractual value of financial guarantees, letters of credit and undrawn loan commitments, where the loan agreed to be provided is on market terms, are not recorded on in the statement of financial position. The nominal values of these instruments together with the corresponding ECL are disclosed in Note 40.

r. Fiduciary activities

The Bank acts as trustees and in other fiduciary capacities that result in the holding or placing of assets on behalf of individuals, trusts, retirement benefit plans and other institutions. These assets and income arising thereon are excluded from these financial statements, as they are not assets of the Bank.

s. Employee benefits

Retirement benefit cost

The Bank contributes to the statutory Social Security & National Insurance Trust (SSNIT). This is a defined contribution scheme registered under the National Social Security Act. The Bank's obligations under the scheme are limited to specific contributions legislated from time to time and are currently limited to a maximum of 13% of an employee's basic salary per month. The Bank also operates a defined contribution benefit scheme for its employees.

The assets of this scheme are held by the treasury department of the Bank. The scheme is funded by contributions from both the employees and employer. Benefits are paid to retiring staff in accordance with the scheme rules. The Bank's obligations to staff retirement benefit schemes are charged to the profit or loss in the year to which they relate.

Provision for employee entitlement

Employee entitlements to annual leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave accrued at the year end.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONTINUED)

s. Employee benefits (continued)

Short-term Employment benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A provision is recognized for the amount expected to be paid under short-term cash bonus or profit-sharing plans, if the bank has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Long service awards

The bank has other long-term employee benefits scheme in the form a long service award for its employees. These are long service awards which accrue to employees based on graduated periods of uninterrupted service. These awards accrue over the service life of employees. Employees leaving the service of the bank after 5 years through retirement (both voluntary and compulsory) or resignation become eligible for these awards based on their current entitlement at the time of retirement or resignation based on their length of service. The bank has no further obligation after the staff exits the bank. The benefits are unfunded.

t. Stated capital and reserves

(i) Share capital

The Bank classifies capital and equity instruments in accordance with the contractual terms of the instrument. The Bank's share capital is not redeemable by holders in the normal course of business and bears an entitlement to distributions that is non-cumulative and at the discretion of the Directors. Accordingly, they are presented as a component of issued capital within equity.

(ii) Share issue costs

Incremental costs directly attributable to the issue of an equity instrument are deducted from equity.

(iii) Dividend on ordinary shares

Dividends on ordinary shares are recognized in the period in which they are approved by the shareholders. Dividend proposed which is yet to be approved by shareholders, is disclosed by way of notes.

(iv) Statutory reserves

Statutory reserves are based on the requirements of section 34(i) of the Banks and Specialised Deposit-Taking Institutions Act, 2016 (Act 930). Transfers into statutory reserves are made in accordance with the relationship between the Bank's reserve fund and its paid-up capital, which determines the proportion of profits for the period that should be transferred.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONTINUED)

(v) Credit Risk Reserves

This is a reserve created to set aside the excess or shortfalls between amounts recognized as impairment loss on loans and advances based on provisions made for bad and doubtful loans and advances calculated in accordance with IFRS and the Central Bank's prudential guidelines.

u. Earnings per share

The Bank presents basic earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Bank by the weighted average number of ordinary shares outstanding during the year.

v. Investment in Associates (equity -accounted investees)

Associates are those entities in which the Bank has significant influence but not control or joint control, over the financial and operating policies. Interests in associates are accounted for using the equity method.

They are recognized initially at cost, which includes transaction costs. Subsequent to initial recognition, the financial statements include the Bank's share of the profit or loss and OCI of equity-accounted investees, until the date on which significant influence ceases.

w. Operating Segments

A segment is a distinguishable component of the Bank that is engaged either in providing products or services (business segment), or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments.

The Bank's primary format for segment reporting is based on business segments.

The Bank has the following main business segments:

- Corporate Banking: includes loans, deposits and other transactions and balances with corporate customers including the Agricultural sector.
- Retail Banking: includes loans, deposits and other transactions and balances with retail customers.
- Central Treasury: undertakes the Bank's funding and centralised risk management activities through borrowings, issues of debt securities, use of derivatives for risk management purposes and investing in liquid assets such as short-term placements and corporate and government debt securities.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Bank's financial statements requires management to make judgements, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities, and the accompanying disclosures, as well as the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. In the process of applying the Bank's accounting policies, management has made the following judgements and assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year. Existing circumstances and assumptions about future developments may change due to circumstances beyond the Bank's control and are reflected in the assumptions if and when they occur. Items with the most significant effect on the amounts recognised in the financial statements with substantial management judgement and/or estimates are collated below with respect to judgements/estimates involved.

4.1. IMPAIRMENT LOSSES ON FINANCIAL ASSETS

The measurement of impairment losses both under IFRS 9 across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Bank's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- The Bank's internal credit grading model, which assigns PDs to the individual grades
- The Bank's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a LTECL basis and the qualitative assessment
- The segmentation of financial assets when their ECL is assessed on a collective basis
- Development of ECL models, including the various formulas and the choice of inputs

Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs

- Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

5. FINANCIAL RISK MANAGEMENT

5.1 Introduction and overview

The Bank's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the Bank's business, and the operational risks are an inevitable consequence of being in business. The Bank's aim is therefore to achieve an appropriate balance between risk and return and minimize potential adverse effects on its financial performance.

The most important types of risk include:

- Operational risk
- Credit risk
- Liquidity risk
- Market risk -includes currency, interest rate and other price risks

5.2 Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the Bank's risk management framework. The board has established Board Audit and Risk Committees and a risk department to assist in the discharge of this responsibility. The board has also established the Credit Committee which is responsible for developing and monitoring risk management in their respective areas.

The Bank's risk management policies are established to identify and analyse the risks faced by the Bank, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions, products and services offered.

The Bank, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment, in which all employees understand their roles and obligations.

The Bank's Audit and Risk Management Committees are responsible for monitoring compliance with the Bank's risk management policies and procedures, and for reviewing the adequacy of the risk management framework in relation to the risks faced by the Bank. The Audit and Risk Management Committees are assisted in these functions by Internal Audit and the Risk Management departments. Internal Audit undertakes both regular and ad-hoc reviews of risk management controls and procedures, the results of which are reported to the Board Audit Committee.

The Bank has a Risk Management department organised into credit control, recoveries and operational control. Under the credit control department, it has credit administration, credit risk appraisal and credit monitoring. The department is responsible for managing all risks to which the Bank is exposed (operational risk, credit risk, liquidity risk, interest rate risk and foreign currency risk.) The risk management department is developing a risk management framework for the Bank.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.2 Risk management framework (Continued)

The Bank treats all branches as independent business units which generate their own income, run their own Profit or Loss Statement and statement of financial position. The head office consolidates these and exercises oversight responsibility over all the branches. Credit is generated at the branch level and is then channeled through the credit control unit of the risk management department where a credit risk appraisal is performed to assess whether to engage the client or not.

The client's file is then moved to the head of risk management and to the other appropriate levels (credit committee, board and so on) for final approval before credit is granted. There is also the monitoring aspect where the head office credit monitoring team monitors the loans and their performance in addition to the monitoring performed at the branch level. Where a loan goes beyond current, it is classified as either OLEM, substandard, doubtful or loss, as recommended by the Central Bank of Ghana. Where a loan goes beyond current, there is the recoveries team which moves in to recover loan losses.

Overall authority for market risk is vested in the ALCO. The Risk Management unit is responsible for the development of detailed risk management policies (subject to review and approval by ALCO) and for the day-to-day review of their implementation.

Exposure to other market risks - Non-trading portfolios

The principal risk to which non-trading portfolios are exposed is the risk of loss from fluctuations in the future cash flows or fair values of financial instruments because of a change in market interest rates. Interest rate risk is managed principally through monitoring interest rate gaps and by having pre-approved limits for repricing bands. ALCO is the monitoring body for compliance with these limits and is assisted by Central Treasury in its day-to-day monitoring activities. In the last three years, the Bank has taken steps to provide the necessary safeguards to ensure that market risk is kept within reasonable limits.

5.3 Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Bank's processes, personnel, technology and infrastructure and from external factors other than credit, market and liquidity risk such as those arising from legal and regulatory requirements and generally accepted standards of corporate behavior.

The Bank's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Bank's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative and creativity.

The primary responsibility for the development and implementation of controls to address operational risk is assigned to senior management within each business unit. The responsibility is supported by the development of overall bank's standard for the management of operational risk in the following areas:

- Requirement of appropriate segregation of duties, including the independent authorization of transactions;
- Requirements for the reconciliation and monitoring of transactions;
- Compliance with regulatory and other legal requirements;
- Documentation of controls and procedures;

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.3 Operational risk (Continued)

- Requirements for the periodic assessment of operational losses faced and adequacy of controls and procedures to address risks identified;
- Requirement for the reporting of operational losses and proposed remedial action;
- Development of contingency plans;
- Training and professional development;
- Ethical and business standards;
- Risk mitigation including insurance where this is effective.

Compliance with bank's standards is supported by a program of periodic reviews undertaken by internal audit, risk and compliance departments. The results of these reviews are discussed with the management of the business unit to which they relate, with summaries submitted to executive committee, audit and compliance committee, governance and risk committee and the board.

Over the past three years, operational risks have reduced due to constant training, automation of many processes and enhancement in controls.

5.4 Credit risk

Credit risk is the risk that the Bank will incur a loss because its customers or counterparties fail to discharge their contractual obligations. The Bank manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for industry concentrations, and by monitoring exposures in relation to such limits. Credit risk is monitored by the Credit Risk Department of the Bank. It is their responsibility to review and manage credit risk, for all types of counterparties. Credit risk consists of line credit risk managers who are responsible for their business lines and manage specific portfolios and experts who support both the line credit risk manager, as well as the business with tools like credit risk systems, policies, models and reporting. The Bank has established a credit quality review process to provide early identification of possible changes in the creditworthiness of counterparties, including regular collateral revisions. Counterparty limits are established by the use of a credit risk classification models, which assigns each counterparty a risk rating. Risk ratings are subject to regular revision. The credit quality review process aims to allow the Bank to assess the potential loss as a result of the risks to which it is exposed and take corrective actions.

For risk management reporting purposes, the Bank considers and consolidates all elements of credit risk exposure.

5.4.1 Management of credit risk

The Board of Directors has delegated responsibility for the management of credit risk to its Credit-Committee and Sub-Board Risk Management Committee. A separate Credit department, reporting to the Executive Committee, is responsible for oversight of the Bank's credit risk, including:

- Formulating credit policies in consultation with business units, covering collateral requirements, credit assessment, risk grading and reporting, documentary and legal procedures, and compliance with regulatory and statutory requirements.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.4.1 Management of credit risk

- Establishing the authorisation structure for the approval and renewal of credit facilities. Authorisation limits are allocated to business units. Larger facilities require approval by the Executive Committee members and the Board (Sub Committee) on risk management.
- Reviewing and assessing credit risk. The Credit department assesses all credit exposures in excess of designated limits, prior to facilities being committed to customers by the business unit concerned. Renewals and reviews of facilities are subject to the same review process. Limiting concentrations of exposure to counterparties, geographies and industries (for loans and advances), and by issuer, credit rating band, market liquidity and country (for investment securities).
- Developing and maintaining the Bank's risk grading in order to categories exposures according to the degree of risk of financial loss faced and to focus management on the attendant risks. The risk grading system is used in determining where impairment provisions may be required against specific credit exposures. The current risk grading framework consists of 5 grades reflecting varying degrees of risk of default and the availability of collateral or other credit risk mitigation. The responsibility for setting risk grades lies with the Board of Directors. Risk grades are subject to regular reviews by the Risk Management Department.
- Reviewing compliance of business units with agreed exposure limits, including those for selected industries, country risk and product types. Regular reports are provided by the credit department on the credit quality of portfolios and appropriate corrective action is taken.
- Providing advice, guidance and specialist skills to business units to promote best practice throughout the Bank in the management of credit risk.

5.4.2. Credit-related commitments risks

The Bank makes available to its customers guarantees that may require that the Bank makes payments on their behalf and enters into commitments to extend credit lines to secure their liquidity needs. Letters of credit and guarantees (including standby letters of credit) commit the Bank to make payments on behalf of customers in the event of a specific act, generally related to the import or export of goods. Such commitments expose the Bank to similar risks to loans and are mitigated by the same control processes and policies management of credit risk.

5.4.3. Definition of default and cure

The Bank considers a financial instrument defaulted and therefore Stage 3 (credit-impaired) for ECL calculations in all cases when the borrower becomes 90 days past due on its contractual payments. The Bank considers treasury and interbank balances defaulted and takes immediate action when the required intraday payments are not settled by the close of business as outlined in the individual agreements. As a part of a qualitative assessment of whether a customer is in default, the Bank also considers a variety of instances that may indicate unlikelihood to pay. When such events occur, the Bank carefully considers whether the event should result in treating the customer as defaulted and therefore assessed as Stage 3 for ECL calculations or whether Stage 2 is appropriate. Such events include:

- Internal rating of the borrower indicating default or near-default
- The borrower requesting emergency funding from the Bank
- The borrower is deceased

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.4.3. Definition of default and cure

- A material decrease in the underlying collateral value where the recovery of the loan is expected from the sale of the collateral
- A material decrease in the borrower's turnover or the loss of a major customer
- A covenant breach not waived by the Bank
- The debtor facing financial difficulties

It is the Bank's policy to consider a financial instrument as 'cured' and therefore re-classified out of Stage 3 when none of the default criteria have been present for at least five consecutive months. The decision whether to classify an asset as Stage 2 or Stage 1 once cured depends on the updated credit grade, at the time of the cure, and whether this indicates there has been a significant increase/decrease in credit risk compared to initial recognition.

5.4.4. The Bank's internal rating and PD estimation process

The Bank's Credit Risk Department operates its internal rating models. The Bank runs separate models for its key portfolios in which its customers are rate from 1 to 6 using internal grades. The models incorporate both qualitative and quantitative information and, in addition to information specific to the borrower, utilise supplemental external information that could affect the borrower's ability to pay. Where practical, they also build on information from Credit Bureaus. These information sources are first used to determine the PDs within the Bank's framework. The internal credit grades are assigned based on these Based II grades. PDs are then adjusted for IFRS 9 ECL calculations to incorporate forward looking information and the IFRS 9 Stage classification of the exposure. This is repeated for each economic scenario as appropriate.

Each exposure is allocated to a credit risk grade on initial recognition based on available information about the borrower. Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade. The monitoring typically involves use of the following data

Corporate Exposures:

- Information obtained during periodic review of customer files - e.g. audited financial statements, management accounts, budgets and projections. Examples of areas of particular focus are: gross profit margins, financial leverage ratios, debt service coverage, compliance with covenants, quality of management, senior management changes.

5.4.5 The Bank's internal rating and PD estimation process

Retail Exposures

- Internally collected data on customer behavior
- Affordability metrics
- External data from credit reference agencies.
- All Exposures
- Payment record - this includes overdue status as well as a range of variables about payment ratios
- Utilization of the granted limit
- Requests for and granting of restructuring
- Existing and forecast changes in business, financial and economic conditions

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.4.5 The Bank's internal rating and PD estimation process (continued)

Generating the term structure of PD

Credit risk grades are a primary input into the determination of the term structure of PD for exposures. The Bank collects performance and default information about its credit risk exposures analyzed by type of product and borrower as well as by credit risk grading. For some portfolios, information purchased from external credit reference agencies is also used. The Bank employs statistical models to analyse the data collected and generate estimates of the remaining lifetime PD of exposures and how these are expected to change as a result of the passage of time.

Bank's internal rating

Grade 1-3: low fair risk

Advances in this category are those for which the borrower is up to date (i.e. current) with repayments of both principal and interest. Indications that an overdraft is still current would include regular activity on the account with no sign that a hardcore of debt is building up.

Grade 4-5

Advances in this category are currently protected by adequate security, both as to principal and interest, but they are potentially weak and constitute an undue credit risk, although not to the point of justifying the classification of substandard. This category would include unusual advances due to the nature of the advance, customer or project, advances where there is a lack of financial information or any other advance where there is more than a normal degree of risk

Grade 6:

Substandard advances display well-defined credit weaknesses that jeopardise the liquidation of the debt. Substandard advances include loans to borrowers whose cash flow is not sufficient to meet currently maturing debt, loans to borrowers which are significantly undercapitalised, and loans to borrowers lacking sufficient working capital to meet their operating needs. Substandard advances are not protected by the current credit worthiness and paying capacity of the customer.

Grade 7

Doubtful advances exhibit all the weaknesses inherent in advances classified as substandard with the added characteristics that the advances are not well-secured and the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors, which may work to the advantage and strengthening of the advance, its classification as in estimated loss is deferred until its more exact status may be determined

Non-performing loans and receivables which are at least 180 days overdue, but less than 360 days overdue are also classified as doubtful.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.4.5 The Bank's internal rating and PD estimation process (continued)

Grade 8

Advances classified as a loss are considered uncollectable and of such little value that their continuation as recoverable advances is not warranted. This classification does not mean that the advance has absolutely no recovery value, but rather it is not practical or desirable to defer writing off this basically worthless advance even though partial recovery may be affected in the future. Advances classified as a loss include bankrupt companies and loans to insolvent firms with negative working capital and cash flow. Banks should not retain advances on the books while attempting long-term recoveries. Losses should be taken in the period in which they surface as uncollectable.

Non-performing loans and receivables which are 360 days or more overdue are also classified as a loss.

5.4.6 Exposure at default

The exposure at default (EAD) represents the gross carrying amount of the financial instruments subject to the impairment calculation, addressing both the client's ability to increase its exposure while approaching default and potential early repayments too. To calculate the EAD for a Stage 1 loan, the Bank assesses the possible default events within 12 months for the calculation of the 12mECL. However, if a Stage 1 loan that is expected to default in the 12 months from the balance sheet date and is also expected to cure and subsequently default again, then all linked default events are considered. For Stage 2, Stage 3 and POCI financial assets, the exposure at default is considered for events over the lifetime of the instruments.

The Bank determines EADs by modelling the range of possible exposure outcomes at various points in time, corresponding the multiple scenarios. The IFRS 9 PDs are then assigned to each economic scenario based on the outcome of Bank's models.

5.4.7 Loss given default

For corporate and investment banking financial instruments, LGD values are assessed at least every year by account managers and reviewed and approved by the Bank's Credit Risk Department. The credit risk assessment is based on a standardised LGD assessment framework that results in a certain LGD rate. These LGD rates consider the expected EAD in comparison to the amount expected to be recovered or realised from any collateral held. The Bank segments its retail lending products into smaller homogeneous portfolios, based on key characteristic that are relevant to the estimation of future cash flows. The applied data is based on historically collected loss data and involves a wider set of transaction characteristics (e.g., product type, wider range of collateral types) as well as borrower characteristics. Further recent data and forward-looking economic scenarios are used in order to determine the IFRS 9 LGD rate for each group of financial instruments. When assessing forward-looking information, the expectation is based on multiple scenarios. Examples of key inputs involve changes in, collateral values including property prices, for mortgages, commodity prices, payment status or other factors that are indicative of losses in the Bank. The Bank estimates regulatory and IFRS 9 LGDs on a different basis. Under IFRS 9, LGD rates are estimated for the Stage 1, Stage 2 and Stage 3 of each asset class. The inputs for these LGD rates are estimated and, where possible, calibrated through back testing against recent recoveries. These are repeated for each economic scenario as appropriate.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.4.8 Significant increase in credit risk

The Bank continuously monitors all assets subject to ECLs. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Bank assesses whether there has been a significant increase in credit risk since initial recognition. The Bank considers an exposure to have significantly increased in credit risk when the IFRS 9 lifetime PD has doubled since initial recognition and has increased by more than 20 bps a year.

The Bank also applies a secondary qualitative method for triggering a significant increase in credit risk for an asset, such as moving a customer/facility to the watch list, or the account becoming forborne. In certain cases, the Bank may also consider that events explained earlier are a significant increase in credit risk as opposed to a default. Regardless of the change in credit grades, if contractual payments are more than 30 days past due, the credit risk is deemed to have increased significantly since initial recognition. When estimating ECLs on a collective basis for a group of similar assets, the Bank applies the same principles for assessing whether there has been a significant increase in credit risk since initial recognition.

As explained earlier dependent on the factors below, the Bank calculates ECLs either on a collective or an individual basis.

Asset classes where the Bank calculates ECL on an individual basis include:

- All Stage 3 assets, regardless of the class of financial assets
- The Corporate lending portfolio
- The large and unique exposures of the Small business lending portfolio
- The treasury, trading and interbank relationships (such as Due from Banks, Cash collateral on securities borrowed and reverse repurchase agreements and debt instruments at amortised cost/FVOCI).

Asset classes where the Bank calculates ECL on a collective basis include the smaller and more generic balances of the Bank's retail business lending.

Incorporation of forward-looking information

The Bank incorporates forward-looking information into both the assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and the measurement of ECL. The Bank formulates three economic scenarios:

- A base case, which is the median scenario assigned a 50% (2021: 70%) probability of occurring, and
- two less likely scenarios;
- one upside 15% (2021: 15%) and
- one downside 35% (2021:15%) probability of occurring.

The base case is aligned with information used by the Bank for other purposes such as strategic planning and budgeting. External information considered includes economic data and forecasts published by governmental bodies and monetary authorities. Periodically, the Bank carries out stress testing of more extreme shocks to calibrate its determination of the upside and downside representative scenarios. The Bank has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses. The key drivers for credit risk are: GDP growth, Inflation, Non performing ratio and interest rates.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.4.8 Significant increase in credit risk (Continued)

Analysis of average inputs to the ECL model under multiple economic scenarios per is detailed below

	upside	19.60%
	downside	21.62%

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.4.9 Measurement of ECL

The key inputs into the measurement of ECL are the term structure of the following variables:

- Probability of Default (PD);
- Loss Given Default (LGD); and
- Exposure at Default (EAD).
- GDP growth and interest rates.

12 months ECL for exposures in Stage 1 is calculated by multiplying the 12-month PD by LGD and EAD. Lifetime ECL is calculated by multiplying the lifetime PD by LGD and EAD. The methodology of estimating PDs, LGD and EAD has been discussed above.

5.4.10 Settlement Risk

- Settlement Risk is the risk that counterparty will fail to deliver cash (or securities) due to be delivered at a particular moment in time, following the release of the corresponding cash (or Securities) by the bank in settlement of a transaction. Further details in respect of this category of credit risk are contained in the Wholesale Credit Risk below.
- Intraday Exposure
Intraday Exposure is a revolving exposure, which arises whenever funds are irrevocably paid away by the Bank in the expectation of the receipt of cleared covering funds (or the deposit of collateral) at some time during the same business day. The Bank may be acting either in its own right, or on behalf of a customer, when it pays away the funds. The products, which give rise to Intraday Exposure, include forex settlements.
- The intraday credit, which the Bank allows its customers, is always in expectation of incoming funds, and as such the exposure is real in that it manifests itself as a borrowing/overdraft when things go wrong.
- The true extent of Intraday Exposure to a customer will be calculated as a single running balance taken at any one point in the day. This running balance will be adjusted by each single transfer of funds into and out of any account in that customer's name, where such transfers represent cleared funds. The same principles apply when accounts are grouped (and where set-off is available) to produce an aggregate net exposure.

5.4.11 Credit Risk Transfers

- This risk arises when certain eligible collateral types (including risk participations, standby letters of credit and bank guarantees) are held to mitigate obligor risk. Whilst these instruments can significantly mitigate obligor credit risk, an alternative risk arises, being reimbursement risk - the risk that the participant/guarantor fails to honour their commitment in the event that the underlying obligor defaults (this is also referred to as double default risk).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
31 DECEMBER 2022

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.4 Credit Risk (Continued)

5.4.13 Loans with renegotiated terms (Continued)

The contractual terms of a loan may be modified for a number of reasons, including changing market conditions, customer retention and other factors not related to a current or potential credit deterioration of the customer. An existing loan may be derecognised and the renegotiated loan recognised as a new loan at fair value in accordance with the accounting policy set out in Notes 5.4.

The Bank renegotiates loans to customers in financial difficulties to maximise collection opportunities and minimise the risk of default. Under the Bank's forbearance policy, loan forbearance is granted on a selective basis if the debtor is currently in default on its debt or if there is a high risk of default, there is evidence that the debtor made all reasonable efforts to pay under the original contractual terms and the debtor is expected to be able to meet the revised terms.

The revised terms usually include extending the maturity, changing the timing of interest payments and amending the terms of loan covenants. Both retail and corporate loans are subject to the forbearance policy.

For the purposes of disclosures in these financial statements, 'loans with renegotiated terms' are defined as loans that have been restructured due to a deterioration in the borrower's financial position, for which the Bank has made concessions by agreeing to terms and conditions that are more favourable for the borrower than the Bank had provided initially and that it would not otherwise consider. A loan continues to be presented as part of loans with renegotiated terms until maturity, earlier repayment or until it is written off.

Irrespective of whether loans with renegotiated terms have been derecognised or not, they remain disclosed as impaired until there is sufficient evidence to demonstrate a significant reduction in the risk of non-payment of future cash flows and there are no other indicators of impairment.

When the contractual cash flows of a financial asset are renegotiated or otherwise modified, and the renegotiation or modification does not result in the derecognition of that financial asset, a bank shall recalculate the gross carrying amount of the financial asset and shall recognise a modification gain or loss in profit or loss. The gross carrying amount of the financial asset shall be recalculated as the present value of the renegotiated or modified contractual cash flows that are discounted at the financial asset's original effective interest rate (or credit adjusted effective interest rate for purchased or originated credit-impaired financial assets).

Any costs or fees incurred in adjusting the carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset.

AGRICULTURAL DEVELOPMENT BANK PLC

NOTES TO THE FINANCIAL STATEMENTS 31 DECEMBER 2022

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.4 Credit Risk (Continued)

5.4.14 Collateral held and other credit enhancements, and their financial effect

The Bank holds collateral and other credit enhancements against most of its credit exposures. The Bank holds collateral against loans and advances to customers in the form of cash, mortgage interests over property, other registered securities over assets, and guarantees. Estimates of fair value are based on the value of collateral assessed at the time of borrowing and generally updated when a loan is individually assessed as impaired. Collateral generally is not held over Interbank placements, except when securities are held as part of reverse repurchase and securities borrowing activity. Collateral usually is not held against investment securities, and no such collateral was held at 31 December 2022. An estimate of the fair value of collateral and other security enhancements held against loans and advances to customers is shown below:

Loans and advances to customers

Collateral held and other credit enhancements, and their financial effect

	2022	2021
	GH¢'000	GH¢'000
Against individually impaired		
Property	1,423,374	666,908
Others	21,889	8,803
Against neither past due nor impaired		
Property	3,330,020	1,166,036
Others	<u>563,271</u>	<u>251,754</u>
Total	<u>5,338,554</u>	<u>2,093,501</u>

i) Loans and advances to customers

The general creditworthiness of a customer tends to be the most relevant indicator of credit quality of a loan extended to it (see Note 5(i)). However, collateral provides additional security and the Bank generally requests that borrowers provide it. The Bank may take collateral in the form of a first charge over real estate, floating charges over all assets and other liens and guarantees. The Bank routinely update the valuation of collateral held against all loans to customers according to Section 79(1) of Act 930. For impaired loans, the Bank obtains appraisals of collateral because the current value of the collateral is an input to the impairment measurement.

ii) Other types of collateral and credit enhancements

In addition to the collateral obtained for loans, the Bank also holds other types of collateral and credit enhancements such as second charges and floating charges for which specific values are not generally available.

iii) Assets obtained by taking possession of collateral

Repossessed items are not recognized in the bank's books. Proceeds from their sale are used to reduce related outstanding indebtedness. The Bank has in its possession assets resulting from taking possession of collateral held as security against loans and advances at the reporting date (2021: nil). The carrying amount of the property are based on court judgments and valuation by the court.

5.4.15 Concentrations of credit risk continued

Investment securities

These are investments in Government Treasury Bills, Notes and Bonds.

5.4.16 Regulatory Provisions

An account is considered to be in default when payment is not received on due date. Accounts that are overdue by more than 90 days are considered delinquent. These accounts are closely monitored and subjected to a collection process. The process used for provisions is based on Bank of Ghana guidelines which recognize cash as a credit mitigate. Individual provisions are made for outstanding amounts depending on the number of days past due with full provisions made after 360 days. In certain situations, such as bankruptcy, fraud and death, the loss recognition process is accelerated. Loans and advances less than 90 days past due are generally not considered delinquent unless other information is available to indicate otherwise.

The Bank of Ghana Guideline is as set out below:

Grade Description	Number of days	Provisions (%)
Current	Less than 30 days	1
Other Loans Exceptionally Mentioned (OLEM)	30 to less than 90 days	10
Substandard	90 to less than 180 days	25
Doubtful	180 to less than 360 days	50
Loss	360 days and above	100

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

5.5 Liquidity risk

Liquidity risk is the risk that the Bank is unable to meet its payment obligations associated with its financial liabilities when they fall due and be able to replace funds when they are withdrawn. The consequence may be the failure to meet obligations to repay depositors and fulfil commitments to lend.

Management of liquidity risk

The Bank's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Bank's reputation.

The treasury department maintains a portfolio of short-term liquid assets, largely made up of short-term liquid investment securities, loans and advances to banks and other inter-bank facilities, to ensure that sufficient liquidity is maintained within the Bank as a whole.

Exposure to liquidity risk

The key measure used by the Bank for managing liquidity risk is the ratio of net liquid assets to deposits from customers. For this purpose, net liquid assets are considered as including cash and cash equivalents and investment debt securities for which there is an active and liquid market less any deposits from banks, debt securities issued, other borrowings and commitments maturing within the next month.

For the definition of liquidity risk and information on how liquidity risk is managed by the Bank, details of the reported Bank's ratio of net liquid assets to deposits from customers at the reporting date and during the reporting period were as follows:

	2022 %	2021 %
At 31 December	86.11	1.87
Maximum for the period	86.11	16.73
Minimum for the period	80.70	1.87
Average for the period	82.63	9.51

5. FINANCIAL RISK REVIEW - (CONTINUED)

5.6 Market risk

For the definition of market risk and information on the metrics (and their limitations) used by the Bank to manage the market risks of non-trading portfolios,

5.6.1 Interest rate risk and foreign currency risk

The Bank uses the Reuters system to monitor live interest and exchange rates to facilitate trading by the treasury department. This helps the Bank to know what is happening at any moment in time on the markets and where opportunities are present to make gains from higher interest rates. Interest rate risk is managed principally through monitoring interest rate gaps and by having pre-approved limits for reprising bands. The ALCO is the monitoring body for compliance with these limits and is assisted by Risk Management in its day-to-day monitoring activities. A summary of the Bank's interest rate gap position on non-trading portfolios is as follows:

5.6 As at 31 December 2022	Market risk					
	Up to 1 month	1-3 months	3 months less than 6 months	6 months less than 1	1-5 years	Over 5 years

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

5. FINANCIAL RISK MANAGEMENT (CONTINUED)

- Sensitivity analysis - Increase/decrease of 10% in net interest margin
- The interest rate risks sensitivity analysis is based on the following assumptions:
- Changes in the market interest rates affect the interest income or expenses of variable financial instruments;
- Changes in the market interest rates only affect interest income or expenses in relation to financial instruments with fixed interest rates if
- these are recognised at their fair values;
- The interest rate changes will have an effect on interest: sensitive assets and liabilities and hence simulation modelling is applied to financial
- instruments which are quoted at variable interest rates; and
- The projections make other assumptions including that all positions run to maturity.

The table below sets out the impact on current profit after taxation and equity of an incremental 10% parallel fall or rise on all yield curves at the beginning of the financial years beginning on 01 January 2022 and 01 January 2021 respectively.

2022	Scenario 1 Effect of 10% increase in variable interest rate	Scenario 2 Effect of 10% decrease in variable interest rate
Loss after tax	(371,280)	(413,512)
Equity	658,191	615,959
2021	Scenario 1	Scenario 2
	Base	Effect of 10% decrease in variable interest rate
Profit after tax	81,602	129,635
Equity	938,784	986,817
		33,570
		890,572

Assuming no management actions an increase in interest rates would decrease the Bank's loss after tax for the year by GH¢ 329,048 (2021: increase after tax by GH¢ 33,570) and increase equity by GH¢ 700,422 (2021: GH¢ 890,752), while a fall would increase loss after tax and equity by the same margins.

AGRICULTURAL DEVELOPMENT BANK PLC

5.6.2 Foreign exchange risk (Continued)

The following mid inter-bank exchange rates were applied during the year:

	Average rate		Reporting rate	
	2022	2021	2022	2021
Cedis to				
USD 1	8.2781	5.8137	8.5760	6.0061
GBP 1	10.0918	7.2521	10.3118	8.1272
EUR 1	8.6280	6.4437	9.1457	6.8281

Sensitivity Analysis on Currency Risks

The following table shows the effect of the strengthening or weakening of the GH¢ against all other currencies on the company's income statement. This sensitivity analysis indicates the potential impact on the income statements based upon the foreign currency exposures recorded at 31 December 2022. (See "currency risk" above) and it does not represent actual or future gains or losses.

A strengthening/weakening of the GH¢ by 5% against the following currencies at 31 December 2022 would have increased/decreased equity and income statement by the amounts shown below:

This analysis assumes that all other variables, in particular interest rates, remain constant.

	% Change	2022		Change %	2021	
		Income Statement Impact	Income Statement Impact		Income Statement Impact	Income Statement Impact

5. FINANCIAL RISK REVIEW - (CONTINUED)

5.6.2 Foreign exchange risk (Continued)

Market Risk

All trading instruments are subject to market risk, the risk that future changes in market conditions may make an instrument less valuable or more onerous. The instruments are recognised at fair value, and all changes in market directions directly affect net trading income.

Exposure to market risk is formally managed in accordance with risk limits set by senior management by buying or selling instruments or entering into offsetting positions.

5.6.3 Cashflow sensitivity analysis for variable rate instruments

A change of 100 basis points in interest rates at the reporting date will have increased/decreased profit or loss by amounts shown below. Each analysis assumes all other variables in particular foreign currency rates remain constant.

The analysis is performed on the same basis for 2022.

Effects in Cedis	100bp Increase GH¢'000	100bp Decrease GH¢'000
31-Dec-22		
Average for the Period	4,223	(4,223)
Maximum for the Period	8,924	(8,924)
Minimum for the Period	4,701	(4,701)
31-Dec-21		
Average for the Period	4,803	(4,803)
Maximum for the Period	7,282	(7,282)
Minimum for the Period	2,479	(2,479)

The Bank's operations are subject to the risk of interest rate fluctuations to the extent that interest earning assets (including investments) and interest-bearing liabilities mature or re-price at different times or in differing amounts. In the case of floating rate assets and liabilities the Bank is also exposed to basis risk, which is the difference between re-pricing characteristics of the various floating rate indices, such as the savings rate and six months LIBOR and different types of interest. Risk management activities are aimed at optimizing net interest income, given market interest rate levels consistent with the Bank's strategies.

Asset-liability risk management activities are conducted in the context of the Bank's sensitivity to interest rate changes. The actual effect will depend on a number of factors, including the extent to which repayments are made earlier to later than the contracted dates and variations in interest rate sensitivity within re-pricing periods and amongst currencies.

NOTES TO THE FINANCIAL STATEMENTS
31 DECEMBER 2022

5. FINANCIAL RISK REVIEW - (CONTINUED)

5.6.3 Cashflow sensitivity analysis for variable rate instruments (continued)

The rates above show the extent to which the Bank's interest rate exposures on assets and liabilities are matched. These are allocated to time bands by reference to the earlier of the next contractual interest rate re-pricing date and maturity.

5.7 CAPITAL MANAGEMENT

5.7.1 Regulatory Capital

The Central Bank of Ghana sets and monitors capital requirements for the Bank.

The Bank's objectives when managing capital are:

- To safeguard the Bank's ability to continue as a going concern so that it can continue to provide returns for the shareholders and benefits for the other stakeholders
- To maintain a strong capital base to support the current and future development needs of the business
- To comply with the capital requirements set by the Central Bank of Ghana

Capital adequacy and use of regulatory capital are monitored by management employing techniques based on the guidelines developed by the Central Bank of Ghana for supervisory purposes. The required information is filed with the Central Bank of Ghana on a monthly basis

The Central Bank requires each bank to:

- a) Hold the minimum level of regulatory capital of GH¢400 million.
- b) Maintain a ratio of total regulatory capital; to risk weighted assets plus risk weighted off balance assets at above the required minimum of 10%

The Bank's regulatory capital is analysed into two tiers:

- Tier 1 capital, which includes ordinary share capital, share premium, perpetual bonds (which are classified as innovative Tier 1 securities), retained earnings, translation reserve and minority interests after deductions for goodwill and intangible assets, and other regulatory adjustments relating to items that are included in equity but are treated differently for capital adequacy purposes Tier 2 capital, which includes capitalised revaluations reserves, latent revaluation reserves, undisclosed reserves, revaluation reserves, subordinated Loans and Hybrid Capital subject to a limit of 100% of Tier 1 Capital.

The Bank's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The impact of the level of capital on shareholders' return is also recognised and the Bank recognises the need to maintain a balance between the higher returns that might be possible with greater gearing and the advantages and security afforded by a sound capital position.

AGRICULTURAL DEVELOPMENT BANK PLC

NOTES TO THE FINANCIAL STATEMENTS 31 DECEMBER 2022

5. FINANCIAL RISK REVIEW - (CONTINUED)

5.7 CAPITAL MANAGEMENT (CONTINUED)

5.7.2 Capital adequacy ratio

The capital adequacy ratio is the quotient of the capital base of the Bank and the Bank's risk-weighted asset base. In accordance with Central Bank of Ghana regulations, a minimum ratio of 10% is to be maintained.

The Bank's regulatory capital position at 31 December 2022, was as follows:

	2022 GH¢'000	2021 GH¢'000
Tier 1 Capital		
Ordinary share capital	698,700	698,700
Retained earnings	(419,119)	(236,645)
Statutory reserve	182,015	182,015
Other regulatory adjustment	(277,463)	(235,999)
CET1 Capital after Deductions (B)	184,133	408,071.49
Fair Value Reserves	84,417	58,356
Revaluation reserve	109,209	28,766
Disallowed (limited to 3% of RWA)	(66,813)	(21,775)
Tier 2 Capital	126,814	65,347
Total Regulatory Capital (Tier 1 + Tier 2)	310,946	473,418

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
31 DECEMBER 2022

5.7 CAPITAL MANAGEMENT (CONTINUED)

5.7.3 REVIEW OF CAPITAL ADEQUACY RATIO

The allocation of capital between specific operations and activities is, to a large extent, driven by optimization of the return achieved on the capital allocated. The amount of capital allocated to each operation or activity is based primarily upon the regulatory capital, but in some cases the regulatory requirements do not reflect fully the varying degree of risk associated with different activities. In such cases the capital requirements may be flexed to reflect differing risk profiles, subject to the overall level of capital to support a particular operation or activity not falling below the minimum required for regulatory purposes. The process of allocating capital to specific operations and activities is undertaken independently by the Bank Credit Committee and or ALCO as appropriate.

Although maximization of the return on risk-adjusted capital is the principal basis used in determining how capital is allocated within the Bank to particular operations or activities, it is not the sole basis used for decision making. Account also is taken of synergies with other operations and activities, the availability of management and other resources, and the fit of the activity with the Bank's longer-term strategic objectives. The Bank's policies in respect of capital management and allocation are reviewed regularly by the Board of Directors

5.7.4 MINIMUM CAPITAL REQUIREMENT

In accordance with Section 28 (1) of the Banks and Specialised Deposit-Taking Institutions Act, 2016 (Act 930), the Bank of Ghana (BOG) increased the minimum capital requirement for commercial banks from GH¢ 120 million to GH¢ 400 million.

The Directive required all Banks to comply with the new capital requirement by the end of December 2018. Non-compliance with the new minimum paid up capital requirement shall be dealt with in accordance with section 33 of the Banks and Specialised Deposit-Taking Institutions Act, 2016 (Act 930).

Banks are required to meet the new capital requirements using either of the following methods:

- ▶ Fresh capital injection;
- ▶ Capitalisation of retained earnings; and
- ▶ A combination of fresh capital injection and capitalisation of retained earnings.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
31 DECEMBER 2022

6. FAIR VALUES OF FINANCIAL INSTRUMENTS

The fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments, the Bank determines fair values using other valuation techniques.

For financial instruments that trade infrequently and have little price transparency, fair value is less objective, and requires varying degrees of judgment depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument.

(a) Valuation models

The Bank measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

Level 1: inputs that are quoted market prices (unadjusted) in active markets for identical instruments.

Level 2: inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.

Level 3: inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which market observable prices exist and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates and foreign currency exchange rates and expected price volatilities and correlations.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

Observable prices or model inputs are usually available in the market for listed debt and equity securities, exchange-traded derivatives and simple over-the-counter derivatives such as interest rate swaps.

Availability of observable market prices and model inputs reduces the need for management judgement and estimation and also reduces the uncertainty associated with determining fair values. Availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

6. FAIR VALUES OF FINANCIAL INSTRUMENTS (CONTINUED)

(c) Fair value of financial instruments not measured at fair value

Set out below is a comparison, by class, of the carrying amounts and fair values of the Bank's financial instruments that are not carried at fair value in the financial statements. This table does not include the fair values of non-financial assets and non-financial liabilities:

2022			Fair Value		
In GH¢'000	Carrying Value	Level 1	Level 2	Level 3	Total
Financial assets:					
Due from other Banks	349,720	-	-	383,719	383,719
Investment securities	1,316,584		485,348	1,172,380	1,657,728
Loans and advances to customers	3,242,188	-	3,263,496	490,699	3,754,196
	4,908,493	-	3,748,845	2,046,798	5,795,642
Financial liabilities:					
Borrowed funds	588,438	-	373,589	269,131	642,720
2021			Fair Value		
In GH¢'000	Carrying Value	Level 1	Level 2	Level 3	Total
Financial assets:					
Due from other Banks	346,219	-	-	383,719	383,719
Investment securities	2,400,655		1,238,494	794,489	2,032,983
Loans and advances to customers	<u>2,282,312</u>	-	<u>1,267,590</u>	<u>1,477,797</u>	<u>2,745,387</u>
	<u>5,029,186</u>	-	<u>2,506,084</u>	<u>2,656,005</u>	<u>5,162,089</u>
Financial liabilities:					
Borrowed funds	<u>294,559</u>	-	<u>78,664</u>	<u>255,069</u>	<u>333,734</u>

Any other financial instruments not disclosed on the table above have their carrying amount approximate to the fair value.

Due from other Banks

The fair values of these instrument are estimated by a discounted cash flow model based on contractual cash flows using estimated yields incorporating the counterparties' credit risk.

Loans and advances to customers

The fair values of loans and advances are estimated by discounted cash flow models that incorporate assumptions for credit risks, foreign exchange risk, probability of default and loss given default estimates.

Borrowed funds

The fair value of borrowed funds is estimated by a discounted cash flow model using market rate for similar instruments trading in the market.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
31 DECEMBER 2022

7.a OPERATING SEGMENTS

Operating segments

Segment information is presented in respect of the Bank's business segments. The primary format, business segments, is based on the Bank's management and internal reporting structure.

Business segments pay and receive interest to and from the Central Treasury on an arm's length basis to reflect the borrowing from or placement into the pool of investments.

Segment capital expenditure is the total cost incurred during the period to acquire property and equipment and intangible assets other than goodwill.

The Bank does not have reliance on a single major customer. The total revenue of the Bank during the year was not earned from transactions with a single external customer. No single customer contributed 10 per cent or more of an entity's revenues.

Business segments

The Bank has the following main business segments:

- Corporate Banking: includes loans, deposits and other transactions and balances with corporate customers including the Agricultural sector.
- Retail Banking: includes loans, deposits and other transactions and balances with retail customers.
- Central Treasury: undertakes the Bank's funding and centralized risk management activities through borrowings, issues of debt securities for risk management purposes and investing in liquid assets such as short-term placements and corporate and government debt securities.

31 DECEMBER 2022

20. INVESTMENT SECURITIES (CONTINUED)

	2022	2021
	GHC'000	GHC'000
Maturing within 90 days of date of acquisition	100,000	198,891
Maturing between 90 days - 1 year of date of acquisition	348,360	1,238,494
Maturing above 5 years of date of acquisition	<u>868,223</u>	<u>963,271</u>
	<u>1,316,584</u>	<u>2,400,655</u>

Government bonds as well as Treasury Bills are classified as financial assets at amortized cost as the business model is to hold the financial assets to collect contractual cash flows representing solely payments of principal and interest.

The average interest rate on treasury bills at 31 December 2022 was 23.44% (2021: 12.11%) and the rate for treasury bonds at 31 December 2022 was 35.36% (2021: 24.75%).

20 (iii) Ghana Debt Exchange Program

On 5th December 2022, the Government of Ghana launched Ghana's Domestic Debt Exchange programme, an invitation for the voluntary exchange of approximately GHS137 billion of the domestic notes and bonds of the Republic, including E.S.L.A. and Daakye bonds, for a package of New Bonds to be issued by the Republic. The Exchange excludes Treasury Bills in totality, and notes and bonds held by individuals (natural persons).

The Ghana Debt Exchange Program resulted in direct and indirect additional impairment on bonds broken down as follows:

S/N	Description	Impairment Charge (Ghc'000)
1.	GoG Bonds	331,180
2.	Local dollar bonds	6,432
3.	Cocoa bills	3,532
4	Due from other banks	<u>34,003</u>
	Total	<u>375,147</u>

Net carrying amount of bonds impaired by the GDDEP is analyzed below:

AGRICULTURAL DEVELOPMENT BANK PLC

NOTES TO THE FINANCIAL STATEMENTS 31 DECEMBER 2022

32. OTHER LIABILITIES (CONTINUED)

(i) Movement in the liability for staff long service awards

The Bank has a long service award for its employees. These are long service awards which accrue to employees based on graduated periods of uninterrupted service. These awards accrue over the service life of employees. Employees leaving the service of the Bank after 5 years through retirement (both voluntary and compulsory) or resignation become eligible for these awards based on their current entitlement at the time of retirement or resignation based on their length of service. The bank has no further obligations once the staff leaves employment.

	2022	2021

40. CONTINGENCIES AND COMMITMENTS INCLUDING OFF BALANCE SHEET ITEMS

In common with other banks, the Bank conducts business involving acceptances, guarantees, performances and indemnities. The majority of these facilities are offset by corresponding obligations of third parties. The Bank also holds certain securities in its own name on behalf of customers. The values of these securities are not recognized in the statement of financial position.

Letters of credit commit the Bank to make payments to third parties, on production of documents, which are subsequently reimbursed by customers.

Guarantees are generally written by a bank to support performance by a customer to third parties. The Bank will only be required to meet these obligations in the event of customer's default.

AGRICULTURAL DEVELOPMENT BANK PLC

Provident Fund	<u>9,975</u>	<u>8,238</u>
Total	<u>27,179</u>	<u>22,463</u>

43. ASSETS PLEDGED AS SECURITY

At 31 December 2022 the value of government securities pledged as collateral was GH¢ 210,800 (2021: 13,500)

44. COLLATERAL ACCEPTED AS SECURITY FOR ASSETS

At 31 December 2022 the value of government securities accepted as collateral that the Bank is permitted to sell or re-pledge in the event of default was GH¢ 120,393 (2021: GH¢70,200).

These transactions are conducted under terms that are usual and customary to standard lending, and securities borrowings and lending activities.

45. NATIONAL FISCAL STABILISATION LEVY AND FINANCIAL RECOVERY LEVY

The National Fiscal Stabilisation Levy Act 862 became effective from 12 July 2014. Under the Act, a 5% levy will be charged on profit before tax and is payable quarterly. The Financial recovery levy became effective from January, 2021. Under the Act, a 5% levy will be charged on profit before tax and is payable quarterly.

AGRICULTURAL DEVELOPMENT BANK PLC

NOTES TO THE FINANCIAL STATEMENTS 31 DECEMBER 2022

46. REGULATORY DISCLOSURES

(i) Non-Performing Loans Ratio

Percentage of gross non-performing loans ("substandard to loss") to total credit/advances portfolio (gross): 29.74% (2021: 31.21%).

(ii) Compliance with Capital Requirement Directive (CRD)

The Capital Requirement Directive at the end of December 31, 2022 was calculated at approximately 7.36% (2021: 14.49%), which is below the minimum required by the regulator of 10 %. Also, the bank's unimpaired capital of GH¢206m is below the minimum capital of GH¢400m.

To bring relief to the banking sector following the GDDEP, the Central Bank has given banks up to three years to restore any diminution in capital arising from the program. Consequently, the board will engage shareholders for additional injection of capital to restore capital to pre-GDDEP levels where necessary. It is important to note the bank will be able to fulfil its obligations to depositors during the next 12 months.

(iii) Liquid Ratio

Percentage of liquid assets to volatile liabilities: 86.11% (2021: 101.87%).

47. SUBSEQUENT EVENTS

There were material significant events after the reporting date that require disclosure in and adjustment to the financial statements for the year ended 31 December 2022. The Government concluded the Domestic Debt Exchange Program (DDEP) which was announced in November 2022 on 21st February 2023. The impact of the DDEP on the Financial Statements resulted in ECL of GHS 375million.

48. ADJUSTMENT FOR NON-CASH ITEMS

	2022	2021
